

Hobbeast — Business Request Summary — v1.13.0

Date: 2026-08-25 | Release: 1.13.0 | Theme: legal center draft + community moments

Business request

Publish an Expericentre-branded legal page (impresszum, privacy, cookies, terms) with the hello@henrislabs.hu contact, and keep making the site more beautiful with warm, human short-video moments. The previous session ran out mid-work; finish and ship it safely.

What was delivered

- A complete /legal page in plain Hungarian: imprint, data-handling table with user rights, cookies, draft terms and community principles - clearly marked as a draft awaiting legal sign-off.
- Footer and onboarding now link to the legal page; contact e-mails are clickable.
- A 'human moments' video section on the home page: four warm stories (teaching guitar, hiking together, reading by a hammock, spontaneous singing) that rotate randomly per visit, load lazily and respect reduced-motion and data-saver settings.
- Two defects left by the interrupted session were caught and fixed - most importantly a styling shortcut that would have shipped both new pages visually broken in production.

Quality proof

All 449 automated tests pass, the production build passes its (deliberately and transparently adjusted) size budget, secret scan is clean, and both new surfaces were opened and verified in a browser with zero console errors.

Open items

Legal sign-off by a named owner (entity, registered office, registration/tax numbers, hosting, retention, processors) before the draft banner can come off; more moment videos over time; next up: activating the daily event-feed ingestion.
