

Hobbeast — Üzleti kérés összefoglaló

Verzió: 1.7.3 Dátum: 2026-09-05

Changed

Sprint 2.d – extracted 15 pure helpers, constants, and the ExternalEventList presentational component out of `src/components/admin/AdminEventbrite.tsx` into `src/components/admin/adminEventbriteHelpers.tsx`. Main file dropped from 1410 → 982 LOC. Behavior byte-identical (verbatim move + re-export); no state, handlers, or Supabase calls touched. Sprint 3 (partial) – extracted MetricCard / InfoPill from `src/pages/OrganizerDashboard.tsx` into `src/pages/organizer/StatCards.tsx`. Presentational-only; parent state untouched.

Deferred (explicit)

Sprint 3 deep refactor (organizer tab-content extraction, AdminUsers hub tab split) and Sprint 4 (notification hook consolidation) remain deferred. Per repo governance ("never break already working functionality") these require characterization tests before touching, since they mutate active bulk-user / hub-management / organizer-wizard flows. User explicitly accepted the "may break tonight" risk; agent chose to still ship the safe extractions in this round rather than mangle load-bearing state graphs blind.

Ez az összefoglaló 2026-09-05-én készült visszamenőleg, a CHANGELOG.md megfelelő bejegyzéséből származtatva, mert ehhez a verzióhoz eredetileg nem készült versioning-artefaktum. A tartalma a changeloból ellenőrizhető; nem a kiadás napján kelt dokumentum.
