

Hobbeast — Üzleti kérés összefoglaló

Verzió: 1.19.1 Dátum: 2026-09-05

Fixed

Removed the artificial per-source caps that throttled EVERY source. The owner spotted that telekomspots yielded 10 events while the site lists hundreds — the cause was systemic, not site-specific:

maxDetails 10-12 → 40: only the first 10-12 detail pages were fetched per source per run, across ALL strategies (render, rss, site adapters). Same-first-N bug: over-budget link lists were sliced from the top, so every run re-read the SAME first pages and never reached the rest. Now the subset is shuffled per run (Fisher–Yates), so repeated runs converge to full coverage. telekomspots adapter: 8 scroll rounds (was 4), legacy numeric /events/{id}/ links also accepted; live proof: 10 → 40 events in one run (54s), different 40 next run. Budget rebalance: per-source event cap 150 → 300, detail delay 700 → 350-400 ms, workflow timeout 30 → 50 min (public-repo minutes are free).

Ez az összefoglaló 2026-09-05-én készült visszamenőleg, a CHANGELOG.md megfelelő bejegyzéséből származtatva, mert ehhez a verzióhoz eredetileg nem készült versioning-artefaktum. A tartalma a changeloból ellenőrizhető; nem a kiadás napján kelt dokumentum.
