

Hobbeast — Üzleti kérés összefoglaló

Verzió: 1.24.0 Dátum: 2026-09-05

Added

Competitor-benchmarked top 5: save, calendar, hobby alerts, price filter. Full analysis of 20 candidate features: docs/Hobbeast_Versenyars_Funkcioelemzes.md.

Programok mentése (Meetup/Eventbrite/Facebook „Save”): saved_events table with RLS, toggle_saved_event / list_saved_events RPCs, a save button on the program page and a „Mentett programjaid” panel on the events page. Until now an interesting program was either acted on immediately or lost. Naptár-export (Luma/Eventbrite/Dice): self-contained RFC 5545 iCalendar generator plus a Google Calendar link — no dependency added. Correct CRLF line endings, escaping of , ; \ and newlines, 75-octet line folding, and a two-hour default block. This is the strongest driver of actual attendance. Hobbi-alapú program-riasztás (Bandsintown „track artist” applied to hobbies): list_hobby_alerts matches upcoming programs against the member's favourite hobbies using accent-folded matching, hiding anything already saved. Ingyenes/fizetős szűrő (Eventbrite/Fever): the scraper captures ticket prices, so members can now filter for them. Programs with unknown price are deliberately excluded from the „free” view rather than being promised as free. Megosztás already existed on the program page (link copy), so it needed no work.

Fixed

Hub discovery no longer selects archives: the live run offered /events/past-events, which can only yield expired entries. Archive segments (past-, archiv-, korabbi-, ...) are now rejected anywhere in the path.

Verified

Live: hobby matching returns 526 candidate programs for „Koncert”; the empty result for niche hobbies is data coverage, not a defect — proven in a rolled-back transaction that left no data behind. Scraper run with self-healing active: 45 sources → 406 events, +232 inserted. New tests: calendar export (7), hub discovery (7, incl. archive rejection), price filter (4). Suite: 479 passed. Typecheck, build, perf budget clean.

Ez az összefoglaló 2026-09-05-én készült visszamenőleg, a CHANGELOG.md megfelelő bejegyzéséből származtatva, mert ehhez a verzióhoz eredetileg nem készült versioning-artefaktum. A tartalma a changeloból ellenőrizhető; nem a kiadás napján kelt dokumentum.
